

Revo™

Adjustable Keyboards - Preconfigured Systems

Articulating keyboard system for mouse intensive applications

Combined with the Pinnacle 2™ arm, this is a popular solution for those who prefer to use the mouse positioned over the 10-key pad, or for users with limited reach. Generous mouse area minimizes reach and tilts independently from keyboard platform.

Quickly reposition mouse platform at keyboard level without tools

Pinnacle 2 Arm provides -15° to +10° tilt

Includes tilt indicator gauge for accurate tilt adjustment

Ergonomically designed knob provides easy tilt adjustment

Adjustability – Equipped with a Pinnacle 2 adjustable keyboard arm with:

- No-knob, no-lever height adjustment
- Dual adjustable lift-assist springs provide optimal balance and smooth movement

Adaptable – The Revo platform can comfortably adjust to the reach requirements of short as well as tall computer users. Mouse platform can be quickly switched from right to left side, enabling users to alternate mouse positions, and reduce muscle strain. The 1/4" Ultra-Thin™ phenolic platform minimizes the distance between the forearm and thigh, providing a greater range of ergonomic fit. The Revo keyboard platform also features the Optimizer™ with built-in document holder and cord manager.

Functional – The Revo System is adaptable to fit virtually all workstation shape and size requirements.

Durability – The Revo System meets or exceeds the ANSI/BIFMA standards for performance, durability, and cycle testing, and is backed by WorkRite's Limited Lifetime Warranty.

At WorkRite we believe that every body has a right to work comfortably and safely for maximum productivity. You can trust WorkRite - as 75% of Fortune 100 companies have - to create innovative solutions that flex to the diverse range of user needs, preferences and settings at work today.
